Allenstown | Chichester | Deerfield | Epsom | Pembroke

Improved Communication

Alma is set up to keep parents informed through a parent portal, phone call system, and e-mail. Parents can access a child's attendance, grades, and assignments at all times through the portal and stay up to date on progress or missing assignments.

Better Reliability

Our former system went down quite often. Alma has a strong reputation for being reliable and readily accessible. As such, we encourage both parents and students to use this tool in order to stay up to date with assignments, grades, and attendance.

Alma!

SAU 53 is proud to introduce Alma - our new Student Information and Learning Management System! After an exhaustive search to replace our current system, MMS, Alma was the clear choice and will allow our districts to live our vision of a Competency Based Education that personalizes learning for students. Alma is built on a competency platform, will provide real-time updates on student progress, and ensures that students are being measured by a clear and agreed upon set of standards. We are pleased to have this tool at our disposal and are excited for you to get acquainted with it as parents and students.
